

Get trixbox in a box!

Designed for trixbox® by trixbox. trixbox Appliance makes it even easier for business to get trixbox phone systems up and running.

Why buy separate hardware, download and install software, configure the hardware, and test it all yourself? Buy the trixbox Appliance instead. trixbox Appliance comes with trixbox CE or Pro pre-loaded, tested, and ready to configure right out of the box.

Certified Hardware

trixbox Appliance is stocked with hand-selected hardware components that have been proven to work with trixbox. In fact, we believe so strongly in these components that when you use trixbox Pro with the trixbox Appliance, we give you discounts on support and extended support coverage!

Rackmount Options

Unlike other telephony appliances, trixbox Appliance fits into any business. Literally! With five different mounting options, from a 19" telephony relay rack or cabinet slide-mount, to wall-mount and free-standing options, trixbox Appliance is built to fit your business needs.

Strong Telephony Expansion Capability

Despite being designed for small and medium-sized businesses, trixbox Appliance doesn't skimp on features, functions or benefits. In fact, it can scale up to four T1s or 48 analog lines. trixbox Appliance supports Asterisk®-compatible cards from virtually any telephony card manufacturer.

Enhanced Reliability & Data Security

Reliability is key for any business, whatever the size. With dual hard drives offering data mirroring and a dual power supply option, trixbox Appliance is designed to keep the phones running and the data secure.

Easy Networking

Featuring two network cards, trixbox Appliance can be networked in a variety of configurations to meet your specific business needs. To add even more value, one of the network cards features an onboard 4-port switch.

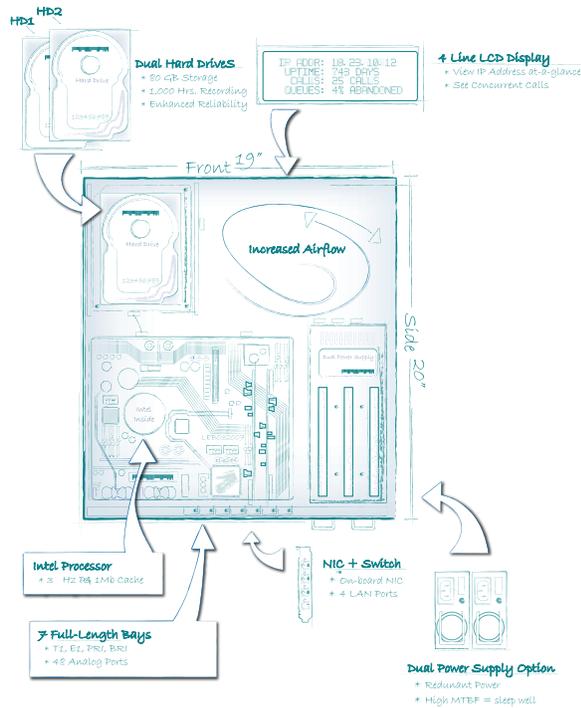

Increased Air Flow

PBX systems often sit in phone closets with poor circulation and cooling, causing systems to overheat and parts to fail. trixbox Appliance was designed with superior airflow ensuring it stays cool in these harsh conditions.

LCD Display

The prominent back-lit 4-line LCD on the front of trixbox Appliance allows you to program any number of custom displays including system status, call and queue metrics, all in a single glance.

All this, for only \$999!
That's quite a trick...
